SUMMARY

Salesforce Engineer with 2+ years of experience designing, building, and owning **scalable, secure, and production-grade Salesforce systems**. Specialized in **Apex, LWC, enterprise integrations, and DevOps automation**, with hands-on experience in **monitoring, troubleshooting, and optimizing live systems**. Focus on **system ownership, performance optimization, and security (OAuth, FLS, sharing models)**, with growing expertise in **AI-driven automation and MCP based tooling** within Salesforce ecosystems.

SKILLS

SALESFORCE TECHNOLOGIES: Agent-force, Integration (Zoho, CallRail, HubSpot) LWC (Component Architecture, Performance Optimization), VF Pages, Flow, Experience Cloud, REST API, Apex (Triggers, Async, Queueable), AURA, MCP

LANGUAGES: Java, Apex, Python, JavaScript, SQL

TOOLS: Workbench, Data-Loader, GIT, GITHUB, GITLAB, Postman, AI

OTHERS: Data Structure and Algorithms, MERN, Redis

WORK EXPERIENCE

MIRKETA	Noida
SALESFORCE DEVELOPER	April 2024 - Present
- Engineered end-to-end Salesforce solutions using Apex, Lightning Web Components (LWC), and Flow automation, aligned with business requirements and compliance standards. - Automated CI/CD and DevOps deployment pipelines, reducing manual intervention and minimizing deployment-related risks. - Maintained Experience Cloud functionality, enforcing role-based access, data visibility, and user behavior through Apex controllers and custom LWC components. - Refactored legacy codebases to improve SOQL efficiency, CPU usage, and long-term maintainability. - Collaborated directly with clients to understand business workflows, propose optimal technical solutions, and deliver features end-to-end.	

KEY PROJECTS

MXNS Ireland – Salesforce Regional Expansion	July 2024 – February 2025
- Led onboarding of Salesforce services for a new geographic region while maintaining uninterrupted service for existing 6 countries. - Ensured strict adherence to data privacy, security, business flow expansion, reports, dashboard and regulatory standards. - Designed seamless rollout strategies with zero impact on existing workflows.	
Your Behavioral Health (YBH)	November 2024 - Present
- Built optimized solutions using Apex, Flows, and async processing (Queueable/Batch) to complex behavioral health workflows. - Architected and implemented a real-time, cross-platform notification system for instant user awareness for new Leads. - Custom Integration for Lead generation from CallRail to Salesforce, reducing the Lead noise by 50%. - Owned requirement gathering, solution design, and implementation through direct client interaction.	
MXNS Newton CRM – Enterprise Support	August 2025 - Present
- Provided ongoing Salesforce support with analysis of functional and data-related requests. - Performed data and user management, refactoring of legacy implementations, survey and case automation and system optimization. - Ensured all enhancements followed strict DevOps and release management practices, maintaining production stability.	

AI + SALESFORCE INITIATIVES

Exploring use of AI for CRM workflows and Business use cases:
- Predictive data enrichment - Smart automation triggers - AI-assisted decision flows - MCP based tooling

EDUCATION

BIT MESRA	Ranchi
B-TECH CSE 8.75 CGPA	2020-2024

ACHIEVEMENTS

- Winner: Mirketa AI Hackathon (2026), AI-agent build competition.
- Rank 1:** College CodeBash (Competitive Programming) (2023), BIT
