

ABHIJIT KUMAR

Salesforce Developer | Apex · LWC · Flow · Integration | Agentforce & AI Automation

Noida, India • +91-7349936587 • [Email](#) • [LinkedIn](#) • [LeetCode](#)

PROFESSIONAL SUMMARY

Salesforce Developer with 2+ years building scalable, secure, production-grade solutions on the platform. Specialized in **Apex, Lightning Web Components (LWC), Visualforce, Flow, and REST integrations** across **Sales, Service, Experience Cloud, and Health Cloud**. Experienced in multi-country enterprise rollouts, asynchronous Apex, and CI/CD DevOps release practices. Winner of the **Mirketa AI Hackathon (2026)**; building at the Salesforce + AI frontier with **Agentforce** and MCP-based tooling.

TECHNICAL SKILLS

Salesforce (Programmatic): Apex, Lightning Web Components (LWC), Aura, Visualforce, SOQL, SOSL, Asynchronous Apex (Batch, Queueable, Future), Triggers, Test Classes, Experience Cloud

Salesforce (Declarative & Admin): Flow, Process Builder, Validation Rules, Permission Sets, Profiles, Sharing Rules, Field Level Security (FLS), Reports & Dashboards

Clouds & Platforms: Sales Cloud, Service Cloud, Experience Cloud, Health Cloud, Revenue Cloud (CPQ)

Integration: REST API, SOAP API, OAuth 2.0, Metadata API, Platform Events, Named, Named Credentials, HubSpot, CallRail, Zoho

AI & Emerging: Agentforce, Einstein, MCP (Model Context Protocol), AI-assisted Automation, Prompt Builder

DevOps & Tools: Git, GitHub, GitLab, CI/CD, Change Sets, Data Loader, Workbench, VS Code, Salesforce CLI

Languages & Foundations: Apex, Java, Python, JavaScript, SQL, Data Structures & Algorithms, MERN, Redis

PROFESSIONAL EXPERIENCE

Salesforce Developer — Mirketa

Apr 2024 – Present

Noida, India | *Salesforce consulting & ISV — client-facing solution design and delivery*

- Engineered end-to-end Salesforce solutions using **Apex, LWC, and Flow**, translating client requirements into production features aligned with compliance standards.
- Built **asynchronous Apex** (Queueable/Batch) for high-volume workflows, keeping processing within governor limits and improving reliability of long-running jobs.
- Automated **CI/CD deployment pipelines**, reducing manual release effort and lowering deployment-related production risk.
- Maintained **Experience Cloud** with role-based access, data visibility, and custom LWC components driven by Apex controllers.
- Implemented an Agentforce agent embedded in Experience Cloud using Agentic Flows and Invocable Actions for automated case handling, product lookups, test result updates, and SLA escalation management.

KEY PROJECTS

Multi-Country Salesforce Expansion — Ireland Rollout

Jul 2024 – Feb 2025

Apex · Experience Cloud · Permission Sets · Metadata API · Change Sets · Data Loader

- Led onboarding of **Ireland as the 7th country** in a live global Salesforce org while keeping service uninterrupted for 6 existing regions.
- Configured profiles, permission sets, groups, and cross-country data-privacy controls with mirrored-field translation.
- Executed a **~240-component production go-live within a ~3-hour window — zero downtime and no post-go-live issues**; designed and delivered the rollout strategy on schedule.

Your Behavioral Health (YBH) — Health Cloud

Nov 2024 – Present

Apex · Flow · Async Apex · REST API · CallRail

- Built optimized **Apex, Flow, and async (Queueable/Batch)** solutions for complex behavioral-health workflows.
- Architected a **real-time, cross-platform notification system** for instant awareness of new Leads.
- Delivered a custom **CallRail → Salesforce** lead-generation integration that **reduced lead noise by ~50%**.
- Developed custom Screen Flow components and LWCs hosted on Experience Cloud, exposed via Embedded Service Deployments for seamless integration and embedding into third-party applications.

Newton CRM — Enterprise Support & Automation

Aug 2025 – Present

Apex · Flow · Data Loader · Git · CI/CD

- Provided ongoing Salesforce support, analyzing functional and data requests for a live enterprise org.
- Performed data and user management, refactored legacy implementations, and automated **survey and case** processes while maintaining production stability under strict release management.

AI + SALESFORCE INITIATIVES

- Built and embedded an Agentforce Service Agent into an Experience Cloud portal using Topics, Apex Invocable Actions, and Agentic Flows to automate case creation, product detail retrieval, test result updates, and SLA compliance notifications — with Omni-Channel escalation and Einstein Trust Layer guardrails.
- Building AI-driven CRM capabilities — **predictive data enrichment, smart automation triggers, AI-assisted decision flows, and MCP-based tooling** — within the Salesforce ecosystem using Agentforce and Einstein.
- Applied AI/agent tooling to real Salesforce workflows; **Winner, Mirketa AI Hackathon (2026)**.

EDUCATION

B.Tech, Computer Science & Engineering — BIT Mesra, Ranchi

2020 – 2024

CGPA: 8.75 / 10 · Rank 1 — College CodeBash (Competitive Programming), 2023
